BIO

Designer architect graduated in Bogotá, he has worked in different aspects of architecture such as the design and construction of single-family homes, the virtual development of projects such as Bcapital and Colombiamoda and the execution of ephemeral architecture in scenographies and fashion runways. It is also considered someone capable in the use of software and in the area of digital development, handles programs such as Rhinoceros 3D, Photoshop, Illustrator, Grasshopper, Sketchup. among others, and has a great interest in developing their capabilities on digital tools. He is considered an outgoing and proactive person, which has also led him to present himself in ideas contests and in different private design projects.
